March

## Life Camp

This is the first time that our students left parents and lived a whole independent day at school. With our joint effort, this is not only a perfect journey with classmates and teachers, but also a challenging, impressive, and inspiring experience with unforgettable memory and love towards each other.

Our P.4, P.5 and P.6 students left their familiar living environment and went on a special trip with the big family. They visited Beijing, Henan, and Singapore separately. During this trip, they visited Beijing Air and Space Museum, experienced the writing of Chinese Oracle, learned about Singapore's water resources and NEWater, and enriched knowledge and broadened horizons.

# MARCH NEWS

## English lessons with New Zealand teachers

New Zealand teachers came to our school to give lively lessons to our students. Our students have strong adaptability and enjoyed the lessons with the new teachers with high engagement and motivation. Their positive and diligent attitude towards learning also impressed the New Zealand teachers!

## Superkid

This was the most exciting day! Students collected many Superkids through good performance and active participation in classes and activities and exchanged gifts provided by school to bring them encouragement and confidence.

## Hamster Guardian Angel

For Life Education, we need to know that there are more than ourselves in this giant world. As human beings, we also shoulder the responsibility to protect the mother Earth.

In our school, we encourage students to use their wisdom and love to take care of the hamster. They actively joined in the hamster guardian angel program and carefully look after the cute animals.
