November Newsletter

Give Thanks

Welcome to the November issue of the Lingnan University Alumni Association (HK) Primary School's Campus TV Newsletter! We're excited to share an action-packed month filled with achievements and experiences that brought our community together.

In celebration of the National Games, our sports teams showed incredible spirit, competing and winning in several tournaments. Outside of school, our talented dancers and martial artists also brought home trophies, while our dedicated PE teachers added to the accolades. Parents joined in on the fun too, trying their hands at pickleball and exploring effective parent-child communication techniques.

Academic excellence shone brightly as our students claimed victories in STEM and public speaking competitions.

Mid-November saw our teachers visiting Foshan for a cultural and professional exchange with our sister school, discovering the rich offerings of that vibrant city. We also immersed ourselves in the arts at M+ and explored history at Kowloon Walled City, with additional visits from celebrated chefs and RTHK, which meant we had a lot to be grateful for during Thanksgiving Week.

To top it all off, our staff, students, and families proudly showcased our collective achievements at the DSS Expo.

However, we ended the month on a sombre note, reflecting on the heartbreaking fire in Tai Po. Our thoughts are with those affected, including the brave emergency personnel serving our community. Together, with resilience and compassion, we hope that the Lingnan family and the rest of Hong Kong can bring some hope to those facing such tragic times.

1 And The Winner Is 1

November was a fantastic month for our students and staff, filled with impressive awards! As athletes excelled in the National Games, so too did our students, with basketball players winning top-shooter awards and the boys' football team reaching the top 16 in the school league. Our younger footballers also displayed pride and sportsmanship in their matches.

The swimming team excelled, achieving excellence in women's Group C and securing third place in the 50m breaststroke. Our P2 dancers triumphed at the K-pop competition, while our martial artists brought home several awards from the HK International Martial Arts Competition.

Additionally, our dedicated PE teachers received well-deserved recognition, and students showcased their vocal talents at the Hong Kong Speech Festival, earning awards for their performances. Congratulations to all our winners! Check our Facebook page for the full list of achievements!

Start Your Engines

Our students recently participated in an exciting STEAM competition at Lingnan Dr. Chung Wing Kwong Memorial Secondary School, where they designed and built their own Formula 1 race cars using paper and compressed air engines in just one hour!

While there could only be one winner, everyone enjoyed the team spirit and learned about the scientific factors affecting car performance. They proudly returned with Merit awards, award for fastest time and recognition for the most gorgeous design.

The day also included an exploration of the school, allowing students to discover its various programs. It was a fantastic opportunity for our budding engineers to learn, collaborate, and have a great time!

Sister School Visit

The teachers of LUAAPS recently enjoyed a one-night, two-day cultural exchange in Foshan. After classes on Friday, November 14th, they were warmly welcomed by the band at Guangzhou Baiyun Jingtai Primary School.

They observed classes and engaged in meaningful discussions with staff and students before exploring Foshan Lingnan Tiandi, where traditional architecture meets modern shopping. The next day, they visited Qing Hui Yuan to admire its beauty and then learned about AI applications at the GAC Technology Museum, discussing how to integrate these insights into their classrooms. This enriching trip strengthened connections and inspired positive change!

Parents Get Pickleball-Ready!

Recently, our parents and PTA members participated in a fun-filled Pickleball Experience, where they honed their skills under the guidance of a skilled coach! This engaging event allowed them to master the game while showcasing their competitive spirit in a friendly atmosphere.

With paddles in hand and laughter in the air, participants enjoyed every moment, strengthening not just their Pickleball prowess but also the bonds within our school community. Creating these enjoyable learning opportunities for adults plays a vital role in fostering a collaborative effort in educating our wonderful students

M+ Visit

Our students recently visited the M+ Museum for the Dream Rooms: Environments by Women Artists 1950s–Now exhibition, and they had a fantastic time! This immersive showcase features 12 installations by groundbreaking women artists from around the world.

The interactive nature of the exhibit thrilled our young explorers. They especially enjoyed Aleksandra Kasuba's Spectral Passage, navigating through nylon structures, and Judy Chicago's Feather Room, filled with 300 pounds of feathers that sparked lots of laughter.

Our trip was a vibrant celebration of creativity and the contributions of women in art, inspiring our students to engage with the power of installation art!

DSS Expo

On 8th November, a group of dedicated teachers, parents and several enthusiastic students represented our school at the Direct Subsidy School Expo, where we were invited to promote our school and achievements. The LUAAPS booth showcased academic pathways, co-curricular successes, and student-led initiatives, drawing steady interest from families and future Lingnanians. Student ambassadors shared personal experiences, while teachers answered detailed questions. The team's professionalism and warmth highlighted our community spirit and helped raise the school's profile across the wider education network.

Kowloon Walled City

Our students recently embarked on an inspiring visit to Kowloon Walled City, where they had the opportunity to enhance their Chinese writing skills amidst the rich history of the Kowloon Walled City Park. Surrounded by beautiful gardens and historical remnants, they tapped into the vibrant atmosphere to ignite their creativity.

As they explored the park, students were encouraged to paint vivid pictures with their words, drawing inspiration from the fascinating sights and stories around them. With each observation, they learned to express their thoughts and observations more eloquently, transforming their experiences into engaging narratives.

Chef's Kiss

On the 26th of November, a renowned chef visited the campus, filling the school hall with lively chatter and the aroma of fresh ingredients. Students watched as the chef demonstrated how to create culinary dumplings — mixing the filling, folding wrappers, and sealing neat pleats.

Guided step by step, they practiced techniques, asked questions, and laughed while creating dumplings and memories with their friends. Soon, steamers hissed, trays filled up, and everyone proudly tasted the dumplings they had made themselves.
